

The Robert and Dorothy Goldberg Charitable Foundation granted White Mountain Community Health Center \$10,000 to help the center continue to provide services to needy children of Mount Washington Valley. These monies will continue to allow the center to provide programs helping local children and parents develop and maintain a healthy lifestyle. Programs provided to area children at WMCHC include pediatric care, children's dental services, nutrition education and social work, Child Care Resource and Referral helping parents locate day care, and Partners in Health which is a program that assists families with children with a chronic illness.

“We are grateful for the grant funds provided by the Robert and Dorothy Goldberg Charitable Foundation which signals their commitment to the local community. Their support of our mission means a great deal to the health center team.” remarks Patricia McMurry, Executive Director of White Mountain Community Health Center.

The Robert and Dorothy Goldberg Charitable Foundation has been funded by Robert and Dorothy Goldberg and first became operational in mid 1999. The foundation provides grants to organizations who reflect the interests of the Goldberg's during their lifetime including the welfare of local children.
